

LEVEL REGULATOR

GENERAL FEATURES

A1 and A2 type level regulator devices are fully automatic devices used to control and adjust liquid level in open and closed containers. That equipment used in all pressurised boilers and water booster up to 16 atm. It consist of 2 pieces 3 functional contact tubes and provides 3 on-off status.

The liquid level is measured by float which is 25 atm pressure resistant stainless steel. The movement of the float moves the switch with a stainless steel shaft. The active movement and sealing of the shaft and the float is provided by 25 atm resistant stainless steel. The contact and control parts are insulated with pressurized aluminium casting.

It is possible to control the device in the system through the manual control and monitoring window in the switch housing.

The switch part is firmly attached against the shocks. There is a safety unit against the wrong adjustments that may occur. There is not wearing sealing box.

Wide range of settings: A1: 15 - 75 mm, A2: 15 - 30 mm. Mercury contact tubes can also be adjusted and can operate at 380 V, 3A, 1.1 kW alternating current or 220 V 1.A 220 VA direct current. The new type Flanged Level Regulator Device provides a practical use with its easy to install feature.

Connection

Threaded or Flanged

Pressure

Max. 25 bar

Working Temperature

Max. Working Temperature 200 °C

Applications

- Water Booster
- Steam boilers

LEVEL REGULATOR

PART LIST		
No	PART NAME	MATERIAL
1	Body	GGG 40.3
2	Gasket	Klingerite
3	Float	AISI 316
4	Screw	
5	Washer	
6	Guide	AISI 304
7	Connector	GGG 40.3
8	Gasket	Klingerite
9	Washer	
10	Imbus Bolt	
11	O-Ring	Silicon
12	Gasket	Rubber
13	Cable Gland	Brass
14	Lower Cover	Aluminium
15	Adjustment Bolt	Brass
16	Washer	
17	Imbus Bolt	
18	Screw	
19	Connector	
20	Cover Gasket	Silicon
21	Washer	
22	Glass	
23	Gasket	Klingerite
24	Upper Cover	Aluminium
25	Washer	
26	Bolt
